ISBN-13: 978-0907789000

Product Dimensions: 8.7 x 6.1 x 0.5 inches

Shipping Weight: 9.1 ounces

Average Customer Review: 3.7 out of 5 stars [See all reviews](#) (3 customer reviews)

Best Sellers Rank: #5,167,075 in Books (See Top 100 in Books) #41 in [Books > Medical Books > Dentistry > Anesthesiology](#) #1267 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Anesthesiology](#) #2097 in [Books > Medical Books > Medicine > Surgery > Anesthesiology](#)

Customer Reviews

I purchased this book in 1982 as a student of the art of Dental Anaesthesia and although it was not on the list of Dental Anaesthesia books required, I found it the best in providing a means to visualize where the target areas are for dental anaesthesia. A monumental task, considering all injections are done "blind." The book includes background information about the concept of pain, pharmacology, psychology of pain and head and neck anatomy. Of all the books I have on Dental Anaesthesia, this one remains my favorite and most used reference source. The full color illustrations, often several on all but a few of the 200 pages, by Poul Buckhoj dissect the target area showing the muscles, bone, nerves, and blood vessels of all the dental injections except the Akinosi-Vazirani mandibular block. The accompanying text is clear, concise, and loses nothing in the translation. If you want the best illustrated text for use in learning dental anaesthesia, this work by Evers and Haegerstam, et. al., is what you should have on the top of your shopping list. It is very sad this book is no longer in print.

Great book and a great price. I have been practicing for eight years now. The book is in the office for reference.

This isn't a handbook of local anesthesia. It's the teddy bear book shown in the picture.
