I have a MEd in Education. I am working toward becoming a reading specialist. I can honestly say that this book is the most useless text I have ever been required to purchase. The author compiled information that anyone has spent time reading already knows. If your professor requires it, ask them to find a text that will actually help you in your quest to learn. This text is NOT it.

The book was simple information for the most part that you could just google to find the info. I was upset that I had to buy it for my education class. I personally felt like it was a waste of my money. But the product itself was in good condition.

I am so grateful the teacher required this book for our class. It was very educational and helpful. A lot of information in this book will help teachers and parents. Children's literature is a very fun class. It is so important to read to and with children. This book reiterates how important it is. Also, many of the books talked about in this text are really good books with good messages.

It was a great textbook and had lots of useful information.
